

# PROFESSIONAL COURSE IN MODERN SURVEYING TECHNOLOGY

This is a comprehensive course intended for candidates aspiring for a position in the Surveying industry. The course covers all aspects of surveying including new technologies and hands-on training and expertise in state-of-the-art survey equipment and gadgets. In a matter of three to four months, an undergraduate student without any technical background is trained in Geoinformatics (from fundamentals to the most advanced Total Station & Real Time Kinematic DGPS Survey) and Hydrographic Survey to become a competent professional for jobs in India and abroad with a high earning potential.

# PROFESSIONAL COURSE IN BUILDING TECHNOLOGY with AutoCAD
